

## COMPANY PROFILE

Since 1948, Fisher Tank Company has been **constructing**, **repairing** and **modifying** above ground carbon and stainless steel bulk storage tanks for industry throughout the Eastern United States. Although we are perhaps best known as a manufacturer of tanks, a companion service -- **the repair, modification and maintenance** of ASTs -- has been an effective and respected part of Fisher Tank operations. Our services focus on such applications as **petroleum** and **chemical** storage tanks, **municipal** water tanks, **reservoirs** and **standpipes**, **fire protection** water tanks, and specialty tanks for **cogeneration** plants and **wastewater** treatment plants.

The company operates fully equipped facilities in Chester, PA and Lexington, SC. Each facility is complete with its own **engineering**, plate metal **fabrication** and field **construction** capabilities.
