

## INDUSTRIES SERVED

### *Fire Protection ::*

Whether it is a single tank for a warehouse, superstore or industrial facility, or a multi-tank project, Fisher can support your needs for fire protection tanks. Many of our tanks are "standard" and can meet your tight schedule. Fisher can also handle determining heater and insulation requirements where required. We are familiar with the **NFPA-22** standard as well as **FM** requirements and can also work to satisfy dual usage tanks for service or potable water needs.
