

## INDUSTRIES SERVED

### *Government/Military ::.*

Fisher understands the specific needs for each of the federal branches we have worked with since 1948. We have performed a variety of work, such as a Fire Protection Tank at an ANG base, Fuel Tanks at a naval installation, Fuel Tanks at an Air Base overseas, and a Water Tank at an undisclosed location. We follow the same rigorous practices necessary to produce quality work, safely and on schedule while adhering to the required standards for the project.
